

Free Christmas Craft Fringe Tree Template

www.Quality-Kids-Crafts.com

Activity Suggestion

Use this page for a pattern to cut tree shapes from green construction paper. If you don't have green paper, just use the white and paint or color both sides of the paper. Marble painting is fun! Just be sure to allow dry time.

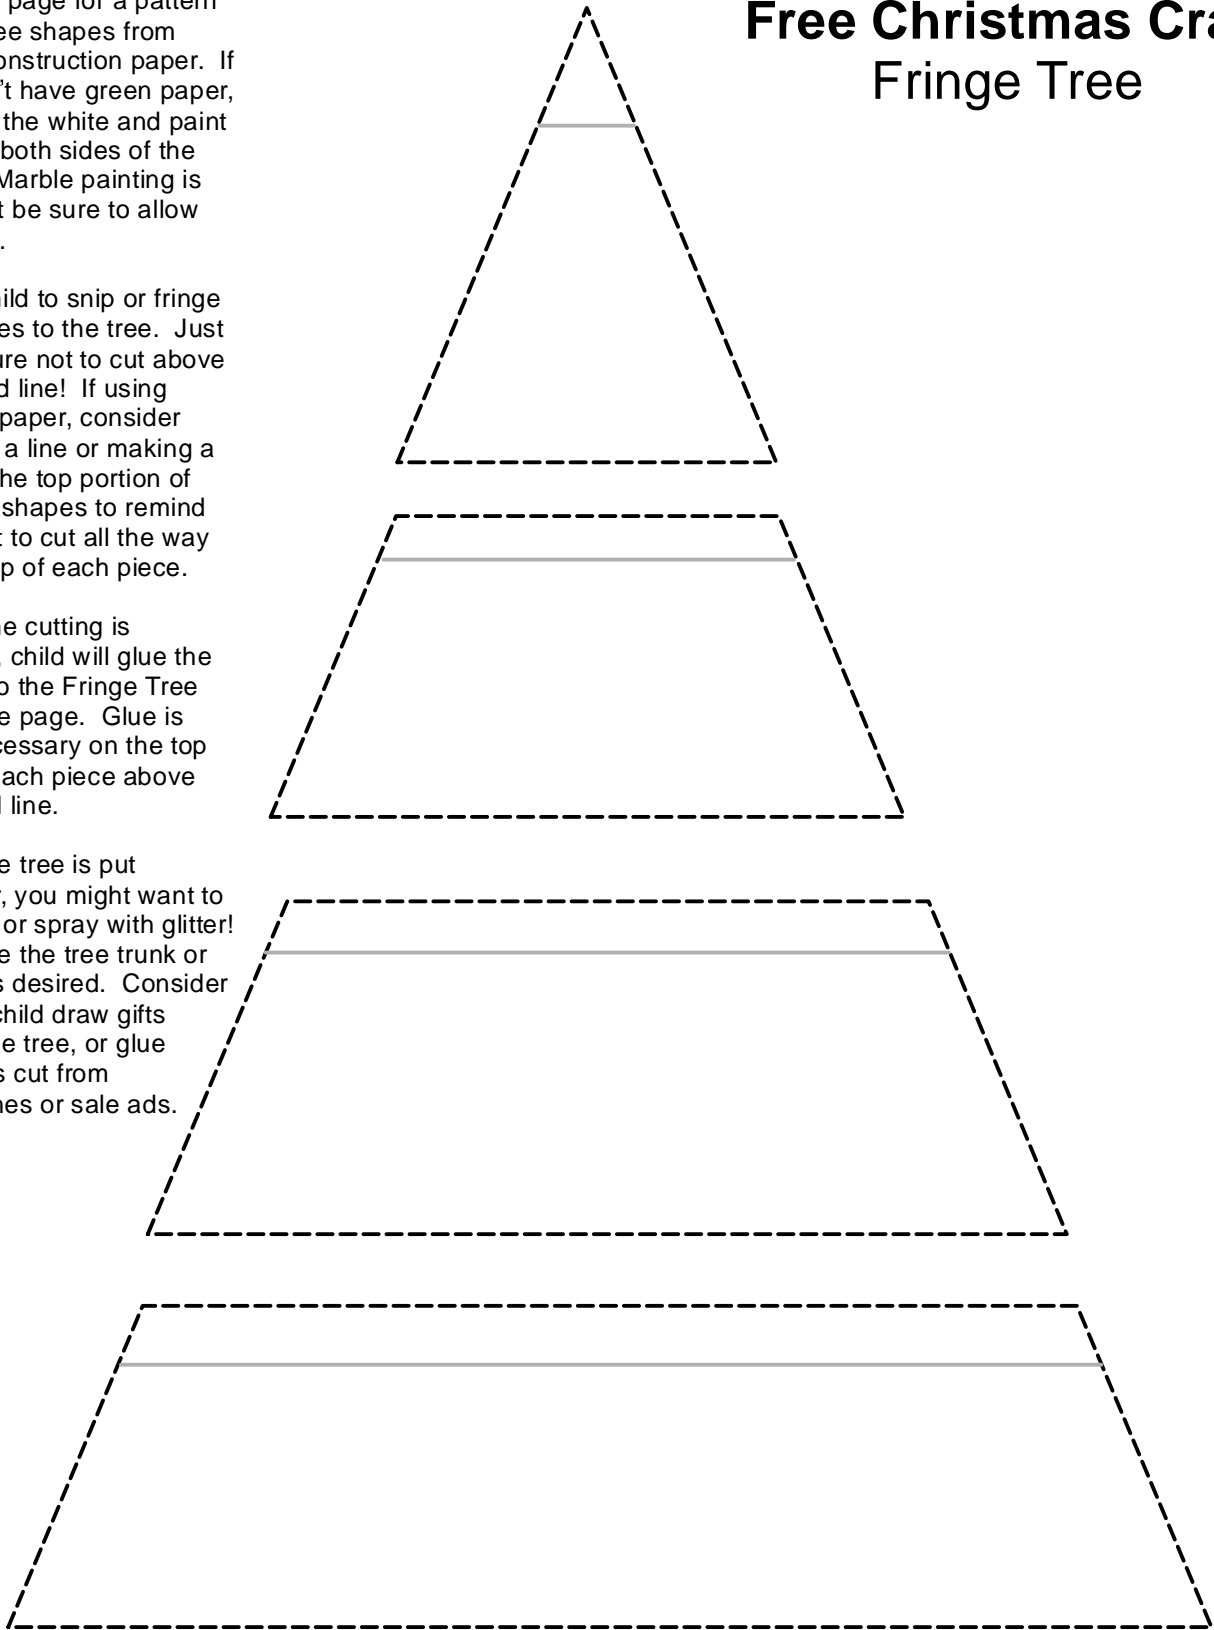

Allow child to snip or fringe the pieces to the tree. Just make sure not to cut above that solid line! If using colored paper, consider drawing a line or making a fold on the top portion of the tree shapes to remind child not to cut all the way to the top of each piece.

When the cutting is finished, child will glue the pieces to the Fringe Tree Template page. Glue is only necessary on the top part of each piece above the solid line.

Once the tree is put together, you might want to sprinkle or spray with glitter! Decorate the tree trunk or stand as desired. Consider having child draw gifts under the tree, or glue presents cut from magazines or sale ads.

Enjoy!
